

## **Taghkanic Broadband Committee**

The Taghkanic Broadband Committee met on April 26, 2016. Of primary interest was progress by GTel in our town. Although the April GTel report showed no installation in Taghkanic, workers were later observed installing cable on Taghkanic Road. We continue to rely on Gtel's commitment to provide fiber throughout our town

Two of the members recommended we reach out to John Reilly to address the town, and one volunteered to do so. We will also seek more information at next month's meeting of the County Subcommittee on Broadband.
