February 10, 2022

Good evening

On Sunday the 23th I meet with Chief Hilscher on the Nugent Road project, from my stand point the project can be done with the understanding the cul-de-sac is built to 70-80 foot with complete black top center, the road to be opened up two lanes with sub base put down to hold weight and traffic in the future. Reason for the size is for future developing of the 100 plus acres that are in the land to the south east if ever decide to be done. If the project is to go farther would need to meet with state to get permission to open road wider thru there parcel that is their backing of the parkway.
