Taghkanic Planning Board Report for October, 2016

One meeting was held, a public hearing on the EAF for Gasland. A biologist consultant was hired to review the plan. His report, along with the planner's and engineer's reports were received for consideration by the board. The Stormwater Prevention Plan requested by DEC was received from the applicant. This changed the design significantly.

A list of information still needed from the applicant for the board to make an environmental determination was made.

Two sign-holders were donated for the purpose of announcing public hearings - one sign to be at the proposed site and one at the town hall (or other meeting location).

Katherine Bainer, Chairperson
