

TCAC Meeting Report
February 12, 2022

The Taghkanic Conservation Advisory Committee presented a public information session on Heat Pump Technology on 2/12/22 at the Taghkanic Firehouse. This 2 hour event was well attended with over 25 people in the live audience and another 24 attending via Zoom. The audience largely consisted of town residents with some neighbors from surrounding communities.

Scott Arnold and Rob Penney from RYCOR HVAC presented a detailed information session on how heat pump technology works. This was clearly a topic that interested many people – we had an enthusiastic Q&A period following the presentation. Additional RYCOR brochures and business cards have been left at the Firehouse and at Town Hall for those who would like additional information. Scott and Rob have offered a \$100 discount on installation charges for any customers who attended the session on Saturday.

Although the CAC and the town of Taghkanic support of this presentation does not constitute an endorsement of RYCOR, we are eager to help our town explore better ways to provide energy to our homes.
