

Columbia County Traffic Safety Board Report

The Columbia County Traffic Safety Board met at the Public Safety Building in Hudson on Thursday, May 27, 2021. **We did not have quorum, so no official business could be conducted.** This includes the long-overdue Election of Officers and the review of the By-Laws.

Reconstruction of the bridge on County Route 10 in Taghkanic has been awarded to A. Colaruso and Son and constructed is expected to begin this summer.

In February of this year, the County sent nine speed zone requests; the County is still waiting for DOT's response. In March, the County received five speed zone requests from various towns in Columbia County, four of which were approved and one was denied. I have asked County Engineering to identify roads for these requests and am awaiting their response. The County sent two applications for culvert replacement to DOT for funding under BridgeNY and two more applications for bridge replacement will be sent to DOT soon.

Respectfully submitted,

Linda Swartz
Town of Taghkanic CCTSB Representative
and CCTSB Recording Secretary
