

To supervisor Tyree and Board Members,

The ZBA held a meeting in May to discuss the application from Gasland Petroleum. After much discussion on the application, the board decided that it would be better to hold joint meetings with the planning board since the applicant needs to get a special use permit from the ZBA and site plan approval from the planning board. The board also met together with the planning board on June 6th. Ted Fink and Morris associates reviewed the application and asked the applicant to provide more information for the boards. Both boards are meeting on **June 27th** to review the new information that we are going to receive.

Respectfully submitted,
Jim Romaine
ZBA chairman
